

Watercolor Magic

Contained in this art kit is a magic white crayon or pastel. Watercolor and wax/ oil naturally resist each other. That means that the crayon or pastel will repel the watercolor, creating beautiful effects.

- Watercolor paint
- Brush and water
- Watercolor paper or other thick paper
- White crayon, oil pastel or candle

Directions

1. Use the white crayon to create a design on the white paper. Some ideas include a starry sky, an underwater scene or a garden.
2. Try to draw with strong lines. Look at your picture in the light to see what you've drawn. because the crayon looks invisible on the white paper.
3. Take out your watercolors and wet each color with a drop of water.
4. Use your watercolors to paint over your design and watch your design appear! You can paint a solid color, stripes or however you choose.
